RUN 190

Hares:

"Pierre" Graham & "Whats Your Name Again " Bishop

The elements did their best by giving us the summer rainfall in one afternoon,

but it takes more than that to keep the G.C. H₃ indoors. A good roll up of 45 turned up at "Footprint" Park, (I have since found out that it is called Mackintosh Park - by the way), to what looked like being a good run - again.

At the appointed time, however, it was ON - ON led incapably by the hares who tried in vain to lead the Hash across the creek for the start. Don't they know old Hash saying -

"You can lead a Hasher to a crossing but you can't make him cross it."

Anyway it turned out to be a loop around Main Beach heading back towards Surfers. The pace was fairley cracking and eventually we came to a check. Too obvoius!!! A loop around Budds Beach while the S.C.B's took full advantage of to rejoin the pack at another check at the Chevron bridge. After several minutes searching - well 30 seconds anyway - the trail was found to cross the Chevron bridge, treating the late afternoon Chevron Island shoppers to a bit of Hash culture. On - Check at the other end of the island left the Hash in two minds:

- 1) On left to go past 4 GG Isle of Capri bridge back home on highway.
- 2) On right to go past TSS Sundale & Home

The Hash then being of fine judgment took the right trail - mainly because it was the shorter route home.

Back at the ON ON the weather was kind and a good night was had by all and it had the ingredients:

- 1) \$5.00 night for a change.
- 2) Plenty of piss
- 3) Good nosh of snags and burgers

A good short- fast run and a top ON ON.

Don't forget XMAS run next week

RUN 196

HARES: Duncaa Baillie & Bandung Barry

We started off the Year in a bright by starting off with a bush run. The resevoir off Mudgeeraba turned out to be an excellent venue as there was plenty of parking and a resevoir that was more like a calendar than a water tank.

A bit of quick work on our resident spark ensured that we had enough power to see what evil concoction we were drinking and eating.

Visitors included a committeeman from the InterHash committee reasurring us that a good time will be had by all and also there was a welcome return to the fold of "Baldy" Benson.

Still minus the horn, but with a generous growth to counteract his baldy nature.

Lewis and Irvine made there annual visit also.

Not waiting for Bruce Elliott (we do after are supposed to start at 5.45pm) the pack set off back down from where we came to the pipeline and then after a short jaunt on right we finally came to a fucking check. With the pack going every which way, but mostly staying on the check, the trail was found to go back up almost to where we started. The hares utilised the good running country to good effect, keeping the pack on good tracks for most of the way. After several loops, it was back to the pipeline and the pack sensing where they were headed On-Right for a good run home to finish with a short 300m sprint up a 45° incline to the ON ON.

A copious quantity of piss was provided to work down an excellent stew, and after the Hash had an eloquent sufficiency of nosh and piss it was ON ON to the Commercial for more piss till stumps.

A good run to start off the year.

CUMMING EVENTS

Noosa

100th

30/31 of this month

GOLD COAST 200th

19/21 /2/82 Keep this weekend free.

Interhash

RUN210

Hares:

Sewerage & Weekly

Every now and again the hash needs a run on which they can say "Now that is what I call an ideal run, next time I do a run, this is what I have to emulate".

Now if you have reached this for, you will now realise that these words are being penned by the most honorable ON-SEC, and his words are true.

A good roll up of about three dozen turned up to the Gaven Forest, just down the road from that infamous house (which is now for sale following reports of the sighting of the Hash Ghost calling 0-0-0-N ! 0-0-0-0-N !).

The pack was left in no doubt as to how the run would go as they immediately started ON-UP and UP, and up to the first check. The trail was found to go down a near cliff but the hares had thought of the pack and had provided a rope ladder to ease th-e descent. Reports to hand, however, say that one Jim Collins tried to demolish half the pack by careering headlong down the rope. ON-UP, following a good trail then ON-LEFT and down.

- " Good trail here "
- " For a change "
- " ON ON "
- " This run is going to be a breeze "
- " OH OH "
- " What do you mean, OH-OH! "
- " We-ve run out of bloody flour "

Meanwhile back at the turn we can hear calls of "ON-ON" hading back up the mountain.

"Those rotten *&e%)+! (The expletative here was censored by the state censor).

ON-UP to an eventual check to the fire tower where the pack was left in no doubt as to which way the trail went, as all trails went DOWN!! They committed themselves to the trail left and into the depths of the black Gaven Forest they went. Down, Down and down they went when, alls of a sudden, the trail disappeared into the bush and into some Hash Shiggy.

So, once bitten twice shy, and the pack ventured in and had a "good" run for about a kilometre to a Five way check. To try and create a bit of time for the trail enders, there were five laid trails one intrail three false trails and the real trail.

The pack, by now, was used to being ginned around the Black Forest and in due course found the right trail, which led them Home to the Hash Piss.

One point! when will the bikes of Danny Cahill & had Dawson start lead "Wrong Way" Yarwood on the trail instead of him leading them around. Reason - they came in about half an hour after everyone e'se, with "Wrong Way" in the lead !!!

The ON-ON was on a convenient footpath where there was copious quantitities of Has Piss and a gourmatic delight of Hot Dogs. So you see as I said before - an excellent Run !

RUN 208

HARES:

Keith Sly & Bruce Gibson

Coomera was again chosen for the venue by Bruce Gibson, and a good roll up of about 35 turned up after their cut lunch and compass trip from the coast. The day's downpour had made the venue just right - muddy as shit and mossies by the fucking thousand.

At the appointed time it was ON - ON , led un-capably by " on bike" Sly. On and on and on we bloody went and when the Hash had just about sucessfully covered itself in shit and crap, they finally decided to have a check. After sucessfully trapping the usual front runners the real trail was found by the tail enders , finally bringing the pack together and it was On - On back into the scrub to get another check - GOOD ONE!!

From here the trail proceeded to describe a large loop through more mud & shit to the Pine Forest which Pat White proceeded to get lost in. It was only a short trip back to the venue from here through to the Hash Piss and Nosh.

The ON - ON was up to the usual Sly/ Gibson standard. Excellent!! This was Hashing - a fine hash stew, and bulk piss. If the Hash could continue in this vein we would have an excellent Hash - Keep it up!!!

S after reading all the above utter bullshit- the verdict - Good run and top ON ON.

HASH CRICKET

The word is out!! The expertise of the GCH3 in cricket has been questioned. The BROADBEACH SHOPPING CENTRE has challanged the Hash- to game of cricket at the Paradise Point Sports Ground on 18/4/82 at 10.30 am. The cost will be \$8.00 and for this paltry sum you get all the XXXX you can drink as well as a Hash Nosh for further sustinance. So roll up you bastards and show the Broadbeach Mob just what good pisspots - an cricketeers we are. Oh! I almost forgot - equipment is provided.

SUBS

Due to the dire financial straits the Hash finds itself in after the 200th , subs are brought forward to this week to pull us out of the shit. SO PAY UP and help us get out of the shit. (Financially that is)
